Fuzion ProjectWorks

Long-range forecasting. Stage-Gate 0–6. Project controls.

ENTERPRISE PORTFOLIO PLATFORM / AVAILABLE

WHAT IT IS

An enterprise portfolio platform for capital programs — long-range forecasting, scenario planning, project controls, outage coordination, compliance tracking, and finance-ready outputs and integration options for SAP, Oracle, Maximo, and Microsoft 365. Offered as SaaS or in your private Microsoft tenant, with modular licensing and role-based dashboards. Integrations are configured for each client during implementation; connector scope is confirmed in your statement of work.

PLATFORM MODULES

- **Power BI Bridge**
  Prepares a governed reporting model; the Power BI connection, certified datasets, and row-level security are integration targets scoped per client during implementation.
- **Long-Range Forecasting**
  Build 5-, 10-, and 20-year CapEx and O&M plans; compare scenarios, prioritize work, and export.
- **Stage-Gate 0–6**
  Seven-gate governance from concept through benefits realization, with criteria, approvals, and portfolio status.
- **Outage Plan**
  Link project milestones to ten-year plant outage windows to make schedule conflicts visible.
- **Project Controls**
  Track project cash flow, earned value, risks, and change orders against budgets and schedules.
- **Nuclear Operations**
  Organize refueling outages, NRC cyber tracking, 50.59 screening, and corrective-action condition reports.
- **CIP Compliance**
  Screen for NERC CIP applicability and track reviews; supports tracking, but does not certify compliance.
- **Admin & Security**
  A five-role model with named-account controls and an audit trail; SSO and MFA are configured with your identity provider during deployment.
- **Accounting Gateway**
  Prepare approved forecasts as ERP-ready journal batches for finance review and export; no live posting.
- **FBO Gateway**
  Routes funding and budget-office transactions between planning and finance, including shared- ownership allocations.
- **Lessons Learned**
  Capture project, gate, outage, and finding lessons to inform future planning and delivery.

INTEGRATION TARGETS

Finance-ready outputs and enterprise connection options.

SAP TARGET	Oracle TARGET	Maximo TARGET
Microsoft 365 TARGET	Power BI TARGET	Excel EXPORT

Integrations are configured for each client during implementation; connector scope is confirmed in your statement of work. Excel export is available. ERP journal batches are exported after finance sign-off; there is no automatic or live ERP posting. Power BI certification and row-level security require integration.

DEPLOYMENT OPTIONS

SaaS

An offered deployment option; hosting, controls, availability, and implementation scope are confirmed for each engagement.

Private Tenant

An option for a client's Microsoft tenant; tenant setup, data controls, and governance require deployment scoping.

Modular Licensing

Eleven modules — forecasting, governance, controls, outage planning, CIP and nuclear tracking, finance workflows, reporting, access administration, and lessons learned — licensed together or separately according to scope. Native iOS and Android apps are roadmap items, not current capabilities.

BUILT FOR

- EPC & Heavy Construction
- Energy, Gas & Oil
- Transmission & Distribution
- Nuclear Generation
- Water & Wastewater
- Infrastructure & Civil
- Commercial Construction
- Public Sector & Tribal
- Telecommunications & IT Infrastructure

IMPLEMENTATION NOTES

Compliance workflows support tracking and evidence organization; they do not certify or guarantee compliance. Named-account access, SSO, and required MFA depend on identity- provider configuration and deployment. Roles in the demo environment use sample accounts; production roles and user controls are configured during deployment.

Fuzion ProjectWorks™ is shaped by a multidisciplinary team of engineering, project controls, construction, and technology consultants with more than 110 years of combined experience.

NEXT STEPS

Step inside the portfolio.

Enter Fuzion ProjectWorks to view the demonstration tenant, or contact Fuzion to discuss your program. Deployment, integration, and enterprise security configurations are scoped with each client.
