

Support Beacon Logistics™

Enterprise logistics at relief-operation scale.

IN DEVELOPMENT · SPRING 2027

FUZION CONSULTING GROUP + JOINT DELIVERY

WHAT IT IS

A planned enterprise logistics application for organizations coordinating fleets, carriers, warehouses, yards, loads, and field deliveries across complex operations. Support Beacon Logistics™ extends the proven operating patterns of Support Beacon Relief™ into commercial and public-sector environments that need real-time visibility, mobile dispatch, structured handoffs, compliance records, and audit-grade reporting.

PLANNED CAPABILITIES

■ Multi-Operation Dispatch

Plan and coordinate loads, routes, drivers, assets, priorities, and delivery windows across teams.

■ Live Load Visibility

Track load status, assignment, location, milestones, exceptions, and proof of delivery.

■ Yard & Dock Coordination

Manage arrivals, queues, appointments, staging locations, dock activity, and handoffs.

■ Compliance & Document Control

Centralize operating documents, inspection records, delivery evidence, and exception history.

■ Fleet & Carrier Management

Maintain carrier, vehicle, driver, insurance, authority, and operating-document records.

■ Warehouse & Inventory Flow

Coordinate inbound receipts, staging, inventory movement, picking, and outbound fulfillment.

■ Mobile Driver & Field Access

Give drivers, operators, and field teams assignment details, updates, documentation, and status tools.

■ Audit-Grade Event Log

Preserve a time-stamped operational record for reporting, accountability, and performance review.

THE ENTERPRISE OPPORTUNITY

Proven logistics patterns, extended for enterprise operations.

Support Beacon Relief™ demonstrated how one shared operating picture can coordinate donors, haulers, loads, and deliveries under pressure. Support Beacon Logistics™ is being designed to carry that discipline into recurring enterprise operations—from hauling and warehousing to infrastructure delivery and regional distribution.

Hauling DISPATCH	Warehouse INVENTORY FLOW	Yard & Dock COORDINATION	Fleet VISIBILITY

STATUS

In Development · Spring 2027

Planned as the enterprise edition within Fuzion's SB217™ platform suite. Product discovery and roadmap validation are focused on hauling, warehouse logistics, field delivery, fleet visibility, and related operations.

Joint Delivery

Delivered jointly by Fuzion Consulting Group™ and Fuzion Chickasaw Group™, pairing enterprise application engineering with field-informed, tribal, municipal, and community logistics experience.

Capabilities Applied

Enterprise workflow design · fleet visibility · mobile operations · document control · audit-grade reporting.

BUILT FOR

- Commercial & Relief Hauling
- Warehouse & Yard Operations
- Construction-Material Delivery
- Utility & Infrastructure Logistics
- Agricultural & Rural Hauling
- Tribal Enterprise Logistics
- Municipal Public Works & Staging
- Nonprofit Distribution Networks
- Regional Carriers & Owner-Operators
- Emergency Supply & Resource Staging

DEVELOPMENT & USE NOTICE

Support Beacon Logistics™ is in development. Capabilities described here reflect planned scope and are subject to change before release; nothing in this brief is a commitment to a specific feature set, integration, certification, or delivery date. The application is intended to support logistics operations and does not replace carrier, warehouse, safety, regulatory, or professional operating responsibilities.

BUILT BY

Support Beacon Logistics™ is delivered jointly by Fuzion Consulting Group™ and Fuzion Chickasaw Group™, built within the SB217™ Support Beacon platform suite.
